SUMMARY

Data analyst who pairs Python/SQL data pipelines with Tableau/Power BI dashboarding and audience-segmentation modeling, translating complex datasets into stakeholder-ready insights — seeking to bring that analytical rigor to marketing performance measurement.

SKILLS

- Programming & Data Analysis:** Python, SQL, R, Pandas, NumPy.
- Dashboards & Visualization:** Tableau, Power BI, Streamlit.
- Data Engineering & Warehousing:** Snowflake, Apache Airflow, Spark, Kafka, Flink, PostgreSQL, AWS.
- AI & LLM Tooling:** Gemini/OpenAI APIs, agentic coding workflows with Claude Code.

EXPERIENCE

Washington University in St. Louis St. Louis, Missouri, USA
Graduate Teaching Assistant - CSE 5114: Data Manipulation and Management at Scale **January 2026 - May 2026**

- Taught large-scale data pipeline and warehousing concepts (Snowflake, Airflow, Spark, Kafka, Flink) to a graduate cohort, covering fault-tolerant design, streaming windowing, and query optimization.
- Mentored 3 capstone teams from raw datasets to production dashboards, reviewing metric definitions and visualization choices for stakeholder clarity.

Critterio, Inc. Remote
AI Engineer Intern **June 2025 - August 2025**

- Generated 100,000 labeled social media posts across seven user personas via time-series behavioral modeling, capturing post sequences, engagement timings, and content preferences by segment.
- Trained a TensorFlow/Keras recommendation model achieving 80% accuracy (30-percentage-point gain over random baseline) with persona-type, content-category, and temporal embeddings, quantifying which content and timing patterns drove engagement by audience segment.

Lab714 Boca Raton, Florida, USA
Data Analyst Intern **June 2023 - May 2024**

- Wrote SQL queries and built AWS data ingestion pipelines to process and aggregate IoT sensor telemetry into client-facing dashboards, surfacing trends and anomalies that helped clients cut maintenance costs by 20%.

PROJECTS

Washington University in St. Louis St. Louis, Missouri, USA
Master's Thesis Research **August 2025 - May 2026**

- Designed a leave-one-participant-out cross-validation framework to rigorously benchmark six model architectures on 790,000 driving trips from 304 participants, applying the same hypothesis-driven evaluation rigor used in experimental design to select the best-performing approach.

Red-Blue Visual Auto Defender **August 2025 - December 2025**

- Built an automated red-blue teaming pipeline using Claude Code for agentic coding workflows, generating visual jailbreak attacks against vision-language models and auto-generating deterministic OCR-based Python defenses, validated with accuracy, precision, and recall metrics.

EDUCATION

Washington University in St. Louis St. Louis, Missouri, USA
M.S. in Computer Science **August 2024 - May 2026**

- *Thesis:* Toward Vehicle-Agnostic Driving Signatures for Cognitive Impairment Prediction from Naturalistic Driving Data

Ohio Wesleyan University Delaware, Ohio, USA
B.A. in Computer Science and Data Analytics **August 2020 - May 2023**

- *Minor:* Economics | *Honors:* Golden Bishop Award, Mortar Board, Florence Leas Prize, Dean's List

LEADERSHIP

Washington University in St. Louis St. Louis, Missouri, USA
Vice President of the Graduate-Professional Council (GPC) Chamber, GPSC **May 2025 - May 2026**

- Chaired the Constitution Committee to draft and ratify founding governing documents; built committee rosters via ranked-choice preference allocation; represented graduate students to university leadership — communicating priorities and progress to senior stakeholders.
