SUMMARY

ML engineer who built end-to-end pipelines processing 790,000 naturalistic driving trips and trained recommendation systems serving seven user personas — seeking data/ML engineering roles.

SKILLS

Programming Languages: Python, TypeScript, JavaScript, SQL, Java, C++, R.
Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, React, Node.js, FastAPI, Socket.IO, Streamlit.
Tools & Technologies: L^AT_EX, Git, AWS, Docker, PostgreSQL, MongoDB, Snowflake, Apache Airflow, Spark, Gemini/OpenAI APIs, Microsoft 365, Google Workspace.
Languages: Proficient in English, Kannada, Telugu; Conversational in Hindi.

EXPERIENCE

Washington University in St. Louis	St. Louis, Missouri, USA
<i>Graduate Teaching Assistant - CSE 5114: Data Manipulation and Management at Scale</i>	January 2026 - May 2026
- Taught large-scale data pipeline concepts (Snowflake, Airflow, Spark, Kafka, Flink) to a graduate cohort, covering fault-tolerant design, streaming windowing, and query optimization. - Designed oral midterms as mock technical interviews, requiring students to reason through pipeline architecture decisions and troubleshoot system failures under real-world constraints.	
<i>Master's Thesis Research</i>	August 2025 - May 2026
- Built an end-to-end pipeline processing 790,000 naturalistic driving trips from 304 older adults, engineering vehicle-agnostic weekly behavioral features to predict cognitive impairment status. - Benchmarked six models (GRU-DANN, DANN, logistic regression, random forest, XGBoost, MLP) under leave-one-participant-out cross-validation; GRU-DANN achieved highest participant-level ROC AUC (0.599) and balanced accuracy (0.584).	
Crittero, Inc.	Remote
<i>AI Engineer Intern</i>	June 2025 - August 2025
- Generated 100,000 labeled social media posts across seven user personas via time-series behavioral modeling in TypeScript, capturing post sequences, engagement timings, and content preferences. - Trained a TensorFlow/Keras recommendation model achieving 80% accuracy (30-percentage-point gain over random baseline) with persona-type, content-category, and temporal embeddings, plus a collaborative-filtering cold-start fallback for new users.	
Lab714	Boca Raton, Florida, USA
<i>Data Analyst Intern</i>	June 2023 - May 2024
- Designed and engineered the Figma-to-React UI for an all-in-one environmental sensor device, delivering a pixel-perfect, production-ready interface from initial wireframes. - Analyzed IoT environmental sensor data on AWS, building client-facing dashboards that surfaced chemical imbalances and equipment alerts — helping clients cut pool maintenance costs by 20%.	

PROJECTS

Washington University in St. Louis	St. Louis, Missouri, USA
<i>Red-Blue Visual Auto Defender</i>	August 2025 - December 2025
Built an automated red-blue teaming pipeline for VLM security, generating visual jailbreak attack images and auto-generating OCR-based Python defenses validated with accuracy, precision, and recall metrics.	

EDUCATION

Washington University in St. Louis	St. Louis, Missouri, USA
<i>M.S. in Computer Science</i>	August 2024 - May 2026
<i>Thesis:</i> Toward Vehicle-Agnostic Driving Signatures for Cognitive Impairment Prediction from Naturalistic Driving Data	
Ohio Wesleyan University	Delaware, Ohio, USA
<i>B.A. in Computer Science and Data Analytics</i>	August 2020 - May 2023
<i>Minor:</i> Economics <i>Honors:</i> Golden Bishop Award, Mortar Board, Florence Leas Prize, Dean's List	

LEADERSHIP

Washington University in St. Louis	St. Louis, Missouri, USA
<i>Vice President of the Graduate-Professional Council (GPC) Chamber, GPSC</i>	May 2025 - May 2026
Chaired the Constitution Committee to draft and ratify founding governing documents; built committee rosters via ranked-choice preference allocation; represented graduate students to university leadership.
