SUMMARY

Research-driven builder who pairs rigorous, detail-heavy analysis with Python/SQL automation and frontier-AI tooling, seeking a research role where technical fluency accelerates target identification and workflow design.

SKILLS

Programming & Automation: Python, SQL, TypeScript, JavaScript, R, scripting/workflow automation.
AI & Data Tools: Gemini/OpenAI APIs, Pandas, NumPy, Apache Airflow, FastAPI, Streamlit.
Data & Platforms: PostgreSQL, MongoDB, Snowflake, AWS, Git, Microsoft 365, Google Workspace.
Languages: Proficient in English, Kannada, Telugu; Conversational in Hindi.

EXPERIENCE

Washington University in St. Louis St. Louis, Missouri, USA
Master's Thesis Research August 2025 - May 2026

- Built an end-to-end research pipeline processing 790,000 naturalistic driving trips from 304 participants, verifying data integrity and reconciling inconsistent source records before analysis.
- Benchmarked six models under leave-one-participant-out cross-validation, documenting methodology and findings in a publishable thesis reviewed by three faculty advisors.

Graduate Teaching Assistant - CSE 5114: Data Manipulation and Management at Scale January 2026 - May 2026

- Taught database and pipeline design (Snowflake, Airflow, Spark, Kafka) to a graduate cohort, including query optimization and data-integrity tradeoffs in production-scale systems.

Critterio, Inc. Remote
AI Engineer Intern June 2025 - August 2025

- Built Python and TypeScript automation scripts to generate and validate 100,000 structured behavioral records, replacing manual data construction with a repeatable, auditable pipeline.
- Used LLM APIs and a configurable CLI to accelerate iteration on a recommendation model, cutting evaluation turnaround while keeping results reproducible across configurations.

Lab714 Boca Raton, Florida, USA
Data Analyst Intern June 2023 - May 2024

- Wrote SQL queries against AWS-hosted IoT sensor data to identify equipment anomalies, building client-facing dashboards that surfaced findings clearly enough to cut maintenance costs by 20%.
- Owned data ingestion and normalization for a live device fleet, keeping downstream records accurate as new sensors and clients came online.

PROJECTS

Washington University in St. Louis St. Louis, Missouri, USA
Red-Blue Visual Auto Defender August 2025 - December 2025

- Built a Python pipeline that auto-generates test attacks and matching defenses, validated with precision/recall metrics, as a self-checking research workflow built and verified end-to-end.

EDUCATION

Washington University in St. Louis St. Louis, Missouri, USA
M.S. in Computer Science August 2024 - May 2026

- *Thesis:* Toward Vehicle-Agnostic Driving Signatures for Cognitive Impairment Prediction from Naturalistic Driving Data

Ohio Wesleyan University Delaware, Ohio, USA
B.A. in Computer Science and Data Analytics August 2020 - May 2023

- *Minor:* Economics | *Honors:* Golden Bishop Award, Mortar Board, Florence Leas Prize, Dean's List

LEADERSHIP

Washington University in St. Louis St. Louis, Missouri, USA
Vice President of the Graduate-Professional Council (GPC) Chamber; GPSC May 2025 - May 2026

- Chaired the Constitution Committee to draft and ratify founding governing documents; built committee rosters via ranked-choice preference allocation; represented graduate students to university leadership.
