Subject: Application for Customer Experience Specialist I - Infrastructure Services, Office of Technology

Dear Hiring Manager,

I am applying for the Customer Experience Specialist I position in the Infrastructure Services division at the University of Central Missouri. I am completing my MS in Computer Science at Washington University in St. Louis, and I believe my technical background and experience supporting students and faculty in higher education align well with the CX team's mission of making technology seamless and accessible.

The position calls for diagnosing and resolving issues across Windows, macOS, and mobile platforms, supporting hardware lifecycle management, and maintaining clear documentation. As a Media Center Assistant at Ohio Wesleyan University, I set up and maintained audio-visual equipment, logged assets, and assisted with event technology—experience directly relevant to field support and lifecycle management. My graduate coursework in systems security and networking has given me familiarity with authentication and access control concepts applicable to account support and MFA troubleshooting. As a Graduate Teaching Assistant, I guided students through building applications with SQL and cloud tools, developing my ability to diagnose issues and explain solutions clearly. I also created process documentation and knowledge-base materials at the Taylor Family Center for Student Success.

Beyond technical qualifications, I bring a commitment to empathy and collaboration developed through years of working directly with students and faculty. As a Computer Science Lab Assistant, I tutored students at varying levels of experience, adapting my approach to meet each person's needs. Through my work with First-Generation, Limited-Income student success initiatives and my leadership as Vice President of the GPC Chamber of the Graduate and Professional Student Council, I learned to listen carefully, communicate clearly, and collaborate effectively within a university community.

What draws me to this role is the CX team's emphasis on documenting not just what was fixed, but how and why—a practice that reflects a genuine commitment to continuous improvement. UCM's values of Community, Opportunity, and Service resonate with my own experience as a first-generation college student who has relied on accessible support systems and now wants to help build them for others.

Thank you for your consideration. I would welcome the opportunity to discuss how my technical problem-solving skills and experience in higher education could contribute to the Customer Experience team at UCM.

Sincerely,

Aadarsha Gopala Reddy
